What Tree Did You Fall From?

October 2019 Monthly Gazette

Hazelnut Tree (October 1–3) Those who fell from the hazelnut tree are honest, charming, and undemanding. Though sometimes they can be moody, they are also understanding of others. Additionally, they know how to make an impression.

Rowan Tree (October 4–13) People who fell from the rowan tree are sensitive and restless. They enjoy being the center of attention. Though they do not forgive easily, they do make for great company.

Maple Tree (October 14–23) Those who fell from the maple tree are very independent. They are full of imagination and originality. Though they are shy and reserved, they are also very ambitious and self-confident.

Walnut Tree (October 24–31) People who fell from the walnut tree are passionate and unrelenting. They are extremely spontaneous. They are not good with compromise, but they are usually very open-minded.

October Fact!

October is a strange month, weather-wise. The first frost usually occurs in October, but days of warm, almost summer-like weather can reappear. Farmers rushing to harvest the last of their crops are grateful for these Indian summer days. October, with its beautifully changing foliage, is one of the most colorful months of the year.
